eLite

Network Discovery and IP Configuration Tool

Overview

eLite is a lightweight, standalone application for network discovery, IP configuration, firmware updates, and simple maintenance on EtherWAN managed switches. The user interface is simple and intuitive, offering quick access to the devices on the network. Configurations can be exported and imported from eLite, reducing the need to access the web GUI or CLI for each device. Devices can be accessed via the Ethernet port, eliminating the need for console (serial) connections.

✚ For managing EtherWAN switches with eLite, you can:

- » Discover devices on the network
- » Modify device default IP settings
- » Upgrade firmware
- » Export/Import configuration
- » Change device passwords
- » Reboot devices

With eLite, you can deploy quickly with just a few clicks!

Specifications

➕ System Requirements

CPU	Intel i5 2.5GHz and above
RAM	4GB and above
Hard Disk	1TB, 7200 RPM, SATA-3Gb/s or higher
Operating System	Windows 10 (64-Bit)
Browser	Microsoft Edge, Chrome v64 or later, Firefox v58 or later, Safari 11.11.1 or later
