Hardened IP67 Outdoor Wireless Access Point

Overview

The eWAV series is a family of hardened IP67 outdoor wireless access points (WAP) providing high-speed wireless connectivity for harsh and demanding environments. Comprised of high-power, long-range single and dual-band IEEE 802.11ac MIMO wireless radios with gigabit IEEE 802.3at PoE connectivity, the series is hardened against extreme temperatures and water ingress.

eWAV delivers the power and range (up to 20 miles) to wirelessly connect remote networks, or extend existing networks in an efficient and cost-effective way. It supports 5GHz 802.11a/n/ac for long-distance Point-to-Point and Point-to-Multi-Point connections with up to 867Mbps transmission speeds.
